¹ These are payments from homeowners for their contribution toward construction costs associated with improvements in their neighborhoods. Bond funds are used to finance these projects. Upon completion of construction, the improvements are assessed and the homeowners make their payments with interest. Funds received (i.e., both principal and interest) are periodically transferred to Fund 200, County Debt Service, to partially assist in paying the debt service costs associated with Neighborhood Improvement projects.

² Represents a reimbursement from the Fairfax County Water Authority in FY 2005 for water main improvements included in the construction contract for Project C00093, Fairdale.

³ The sale of bonds is presented here for planning purposes only. Actual bond sales are based on cash needs in accordance with Board policy. On November 7, 1989, the voters approved \$24.0 million for the Neighborhood Improvement Program. No bonds remain to be sold from the fall 1989 referendum.

⁴ The Transfer Out to Fund 200, County Debt Service Fund, offsets debt service costs associated with the issuance of General Obligation Bonds.

⁵ Capital projects are budgeted based on the total project costs. Most projects span multiple years, from design to construction completion. Therefore, funding for capital projects is carried forward each fiscal year, and ending balances fluctuate, reflecting the carryover of these funds.
